About

I'm a User Experience Professional with a focus on User Interface Design and Interaction Design, backed by a strong foundation in IT. I've adopted a holistic and strategic approach to my work, leveraging this extensive background to design web applications within a B2B business model for a leading telco company. I enhance the digital sales process by simplifying detailed offer procedures into clear and concise content and transforming complex business requirements into human-centered solutions. My expertise also extends to visual media, including video production and graphics, where I infuse a creative touch into my work.

I currently work for Deutsche Telekom, [ranked among the top 10 most valuable brands worldwide].
#1 European Brand - #1 Telecoms Brand - #9 Global Brand

Work experience

Position	**UX/UI Product Designer**
Employer	Deutsche Telekom IT Solutions (Budapest, Hungary)
Date	December 2022 –

Activity

My primary focus is on design initiatives to enhance the offer process for Deutsche Telekom's B2B customers, particularly through the development of new microservice solutions. I hold direct responsibility for executing the end-to-end design process of these digital products, from the discovery phase through ideation and design to usability testing.

- Enhance user experience and user interface of digital products.
- Translate business requirements into user-centric design solutions.
- Create user stories and user journey maps.
- Develop design concepts, wireframes and fully interactive prototypes.
- Create intuitive and visually appealing interfaces for seamless user interaction.
- Collaborate closely with front-end developers within a Scrum team.
- Implement innovative design strategies to enhance product usability.
- Advocate for human-centered design principles and methodologies within the team.
- Continuously iterate and refine designs based on user feedback and usability testing results.
- Document design work to ensure consistency across teams and building guidelines to establish quality.
- Familiar with digital accessibility standards (WCAG) and their implementation.
- Stay updated with industry trends and best practices in UX design.

Position	**Application Manager**
Employer	Deutsche Telekom IT Solutions (Budapest, Hungary)
Date	August 2019 - December 2022

Activity

I hold responsibility for ensuring the consistent and dependable operation of a leading corporate identity and access management tool, which boasts an extensive user base exceeding 200,000 individuals and interfaces with numerous source (HR) and target systems on a global scale within the Telekom organization.

- Evaluate and authorize system releases, service packs, and hotfixes to enhance operational efficiency.
- Act as the primary liaison for communication with interface partners and clients.
- Enforce common IT standards and uphold the quality of configuration item information.
- Provide leadership in overseeing incident, problem, and change management teams.
- Collaborate with cross-functional teams to streamline workflow processes.
- Implement proactive measures to enhance application security and mitigate potential risks.
- Ensure compliance with data protection and security mandates.
- Create comprehensive strategies for continuous improvement of the application supported.

Skills: POPM · ITIL · Operations Management · Service Delivery Management · Application Management · Service Operations · Project Management

Position	**Managed Service Owner (MSO)**
Employer	Unisys (Budapest, Hungary)
Date	August 2013 - August 2019

Activity

I am entrusted with ensuring the reliable performance of a global request tool, which is under the ownership of an external client. I am elected for Employee of the Quarter, recognized for consistently achieving full client satisfaction, and acknowledged for significantly enhancing Unisys' reputation and UGSH capabilities.

- Act as consultant during planning and implementing new services to the application supported.
- Provide assessments on client requirements on functionality, design and process capabilities.
- Manage and control resolvers, 3rd party suppliers and service delivery groups for tooling support.
- Closely work together with client and delivery units (Service Desk, Field Support, PMO).
- Drive escalation management for the tool supported.
- Act as Change, Incident and Problem Manager for the tool supported.
- Lead Change Control Boards.
- Pro-actively identify service improvement or cost reduction opportunities for all services.
- Responsible to meet all service levels, deliverables, and contractual commitments.
- Present effort estimations, costing sheets for tooling changes.
- Prepare functional designs.
- Review risk and impact analysis to ensure it has been performed thoroughly.
- Responsible for regular reporting showing deep analysis on process gaps and improvement actions.
